

Dec. 14th 2011

Hello Mid Coast Flyfishers,

Monday nights meeting in my opinion turned out well, I have never seen that many members at one meeting not including a few new faces that became members. The casting instructions by Capt. Chris Meyers was excellent, Pat Patterson did a great job cooking the food...thanks Pat, and our second guest Bill Gunn from the (FFF) Federation of Fly Fishers did a great job as well. There's lots to talk about in the up and coming weeks as we prepare for 2012.

Next Monday the 19th we will have our normal fly tying night and if any of you would like to tie anything email me and I'll send out a message to everyone. Luc will be tying a fly called Agent Orange, it is a simple shrimp pattern that lands very delicately, swims on its back and is quite weedless because of that. Material needed for this fly-Rayon chenille, medium orange, orange calf tail, and natural grizzly hackle saddle hackle, and an orange thread to match other material. Luc will supply to some if needed.

Also next Tuesday the 20th we will be meeting at 10:30 AM for our clean up on Bio Lab road, email me for more info if needed or wait till Monday to discuss the plans. Remember if you are catching fish and not just fishing I would like you to send me your photos so I can submit them to the Coastal Angler Magazine. Thanks and see you next week.

Capt. Justin Price
